

# FAX★STAR® iSeries Solution

The Complete Software and Hardware Package For The iSeries and Networks

The Complete Messaging Solution

IBM Server *Proven™*

The Fax★Star iSeries Solution contains several components that all together build a solid and powerful Solution. These components are as follows:

## ■ Fax★Star Advanced Server

Installed on a dedicated Windows 2000 workstation, the Advanced Server offers all the features you always wanted to have in a communications server. It contains professional fax boards (up to 72 lines). It converts spooled files to fax or email format and can merge the data with forms, logos and signatures. **All these functions are performed without utilizing any iSeries resources.** The Fax★Star Advanced Server also has extensive inbound fax routing capabilities.

## ■ Fax★Star Network Faxing

Fax★Star has additional capabilities for PC Networks. By utilizing the Fax★Star Mail Gateway for Lotus Notes or Microsoft Exchange or by using Fax★Star Windows software any PC on the Network, users can send outbound faxes. Depending on your network, one or more of these tools apply. **With Fax★Star it has never been easier to fax PC documents.**

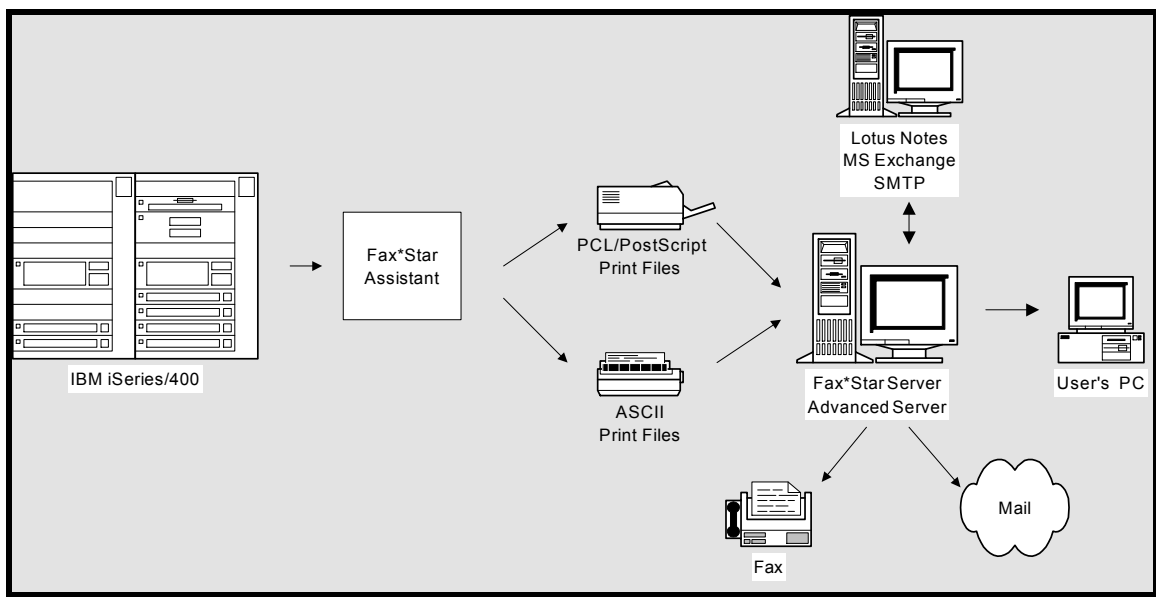

## ■ Fax★Star Assistant Software

Fax★Star Assistant was specifically designed to meet all your iSeries/400 fax and email needs. You can manage traffic, create and send small memos in the word processor, and automate spooled file distribution.

Fax★Star Assistant APIs can automatically select the spooled files, of your choice, and distribute them via email or fax. Fax★Star Assistant also allows the splitting of batched spooled files and can retrieve delivery information from your current database. All this designed so you do not have to **change a SINGLE line of existing code.**

### FAX★STAR USERS

Abbott Labs  
ACCO Brands  
Alliant/Atlantic Foods  
Anheuser-Busch  
Coca-Cola  
C.R. England  
Discovery Channel  
Georgia Pacific  
Goodyear  
J.C. Whitney  
Jim Beam Brands

Nucor Steel  
Utility Trailer  
Office Depot  
WestPoint Stevens  
Wilson Sporting Goods

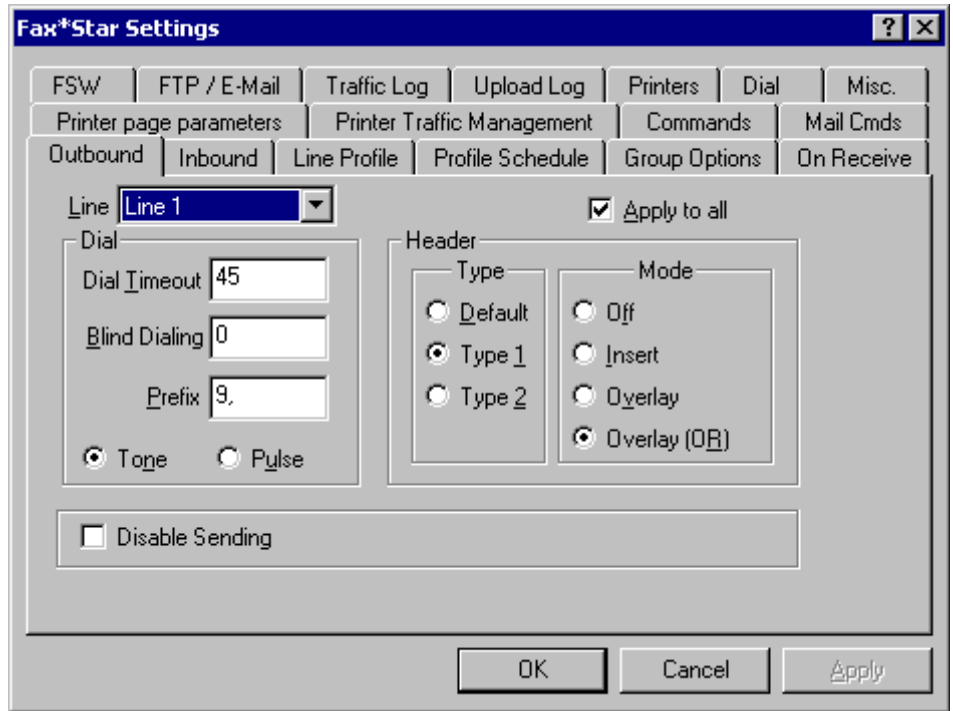

Choose the components you need to build your Fax★Star iSeries Solution. It will soon become the most important piece in your Automated System.

## Fax★Star Advanced Server

The Fax★Star Advanced Server control module screen has many options to integrate into the workflow of a business. Everything from scheduling lines to distributing inbound faxes is covered. Almost every feature can be configured at an individual level or a “global” level. This allows Fax★Star Advanced Server to work with specific users, groups, or specific jobs.

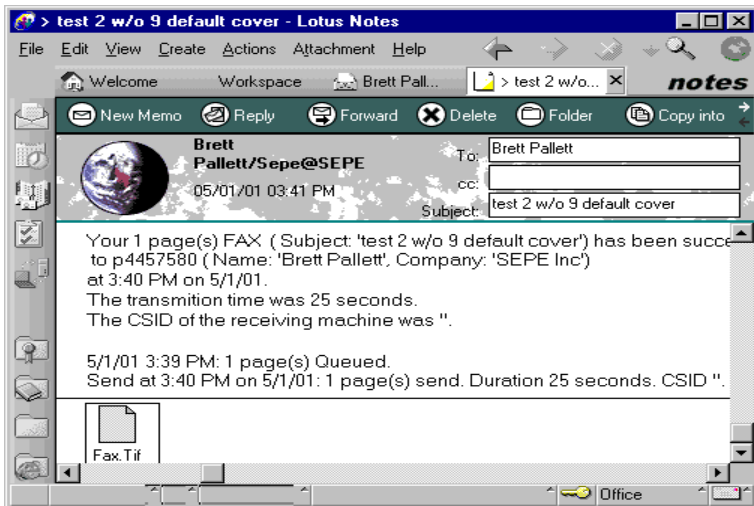

For further explanation on all these features you may wish to view the Fax★Star Advanced Server online demo at [WWW.FAXSTAR.COM..](http://WWW.FAXSTAR.COM..)

## Fax★Star Mail Gateways

Fax★Star Lotus Notes and MS Exchange Mail Gateways are extensions of the Fax★Star Advanced Server that allows the client to fax from their mail client without installing a specific client on every PC. The ability to send attachments the same way they are sending mail and manage fax traffic from their mail boxes.

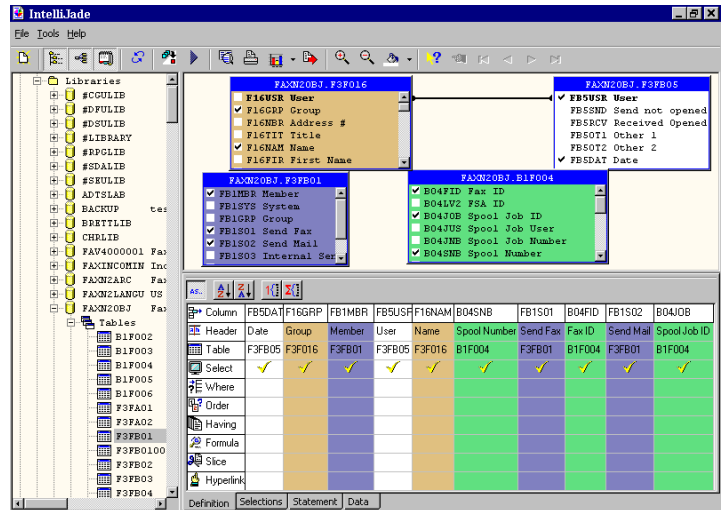

The Fax★Star Advanced Server will send a message to users in their mail boxes to confirm the sending of their fax.

## Fax★Star IntelliJade Business Intelligence

The IntelliJade software is PowerFully Simple Portal and Business Intelligence Solution that easily allows users to create and export information in a variety of formats. IntelliJade can access any database on any server attached to your network.

IntelliJade allows users to query, sort, and produce information into common and readily acceptable formats. IntelliJade is a web server, which executes requests within various databases and publishes the results in realtime.
